This code save with html file and run this

The impact of this vulnerability:

The impact depends on the affected web application.

How to fix this vulnerability:

Configure your web server to include an X-Frame-Options header and a CSP header with frame-ancestors directive. Consult Web references for more information about the possible values for this header.

Recommendation

Configure your web server to include an X-Frame-Options header and a CSP header with frame-ancestors

directive. Consult Web references for more information about the possible values for this header.
